

# AEGIS

SORTATION

More volume. Less downtime. Better, by design!

## INSTALLATION EFFICIENCY

Our company's heritage in supporting the Department of Defense forms the DNA at Aegis – we design to exceed industry standards in reliability, maintainability and availability.

Some key metrics include:

- Quickest Installation Time
- Highest Predictive  $A_0$
- Lowest Mean Time To Repair (MTTR)
- 600 fpm Design Standard

Wherever cost-effective, consistent and intuitive performance is paramount and downtime is not an option, you'll find ultra-rugged Aegis Sortation equipment that exceeds operation requirements.

**The unique design of our upper rail offers a dedicated raceway for controls and network cabling. This feature significantly reduces installation time and cost.**

### THE AEGIS SORTATION DIFFERENCE

Patented technology within Aegis Sortation products enables quicker sorting with speeds exceeding 600 feet per minute. The easy-to-install system offers the industry's lowest meantime to repair and the highest predictive availability.

### KEY TECHNOLOGY

Leveraging both proven and emerging technologies in the development of visionary solutions for state-of-the-art systems.

- > Bespoke Technology
- > Smart Shoe capability
- > Precision extruded aluminum design
- > Two integrated raceways per upper rail
- > Vertigate™ diverts
- > Delivered in pre-assembled, pre-tested sections

### OUR APPROACH

Our products are specifically designed for industry. Always. No exceptions. We implement the following concepts throughout the entire product life-cycle:

- > Design excellence
- > Industry leading Mean Time Between Failure
- > Lowest Mean Time To Repair
- > Cost efficient

### AEGIS SORTATION

Better, by design!
